

## Course Description

In this quick and practical course, you'll learn when to use the Python `is`, `is not`, `==` and `!=` operators. You'll see what these comparison operators do under the hood, dive into some quirks of object identity and interning, and define a custom class.

## ✓ Certificate of Completion

This person's account is verified and was created on Nov. 22, 2020. Real Python certifies their completion of the *Comparing Python Objects the Right Way: "is" vs "=="* course on Feb. 15, 2021.

## About Real Python

[Real Python](https://realpython.com/) is an online learning platform and expert community for Python software developers. It offers interactive online classes and in-depth tutorials created by a team of subject matter experts.
